

Recruiting outsourced processors

- ◎ The prison has set up a number of commissioned processing workshops, each of which can accommodate 50 to 100 inmates. It accepts commissions from manufacturers to process and produce various finished and semi-finished products~~
- ◎ Advantages of OEM ~~ Our supervisor has operation instructors responsible for on-site production management, technical guidance, quality control and dispatching manpower, and fully cooperates with the manufacturer's shipping time; our supervisor provides a spacious operating environment, abundant human resources, and reasonable processing costs. Help various industries improve their competitiveness.
- ◎ Working hours: 8:30 am to 16:00 pm, excluding meals, bathing, medical consultations, interviews, education and other activities for the inmates, the daily working time is about 4 to 5 hours.
- ◎ We are willing to undertake and accept entrustment for non-hazardous processing operations. Common products suitable for processing in prisons include: sewing processing, hardware processing, plastic product processing, clothing and socks packaging, various finished product packaging, finished product frosting or coloring, paper processing... etc. We sincerely welcome all kinds of processing operations. Technical processing is particularly good.
